

Gross Solar and/or Battery Storage Meter
Request Form and Check list

We, _____ (Installer's name) have completed an installation at _____ (customer's address) for _____ (customer's name on GMP account) and GMP account number _____.

Please put an "x" in all applicable installations: Solar ____ / Battery storage AC ____ DC ____

The installation meets the following criteria:

1. A/C disconnect is present with a sign indicating where it is, if it is more than 10 feet away from the meter location.
2. The sockets are grounded correctly per sections 707 A, B and D of the Vermont Utilities Electrical Service Requirement Manual, especially for enclosures that are within touch potential (7 feet).
3. If the Gross Solar or Battery Storage socket is located on a separate structure from the main service meter, the socket(s) is properly grounded per National Electric Code requirements.
4. GMP's solar requirements were reviewed and followed. (Refer to GMP's web site section for solar installers).
5. All meter sockets and disconnects are clearly labelled.
6. If Commercial or Rental Property, energizing permit has been obtained and will be placed in the meter socket prior to meter installation.

It is the customer's responsibility and that of their electrician to ensure that the overall installation meets any applicable requirements of the National Electrical Code.
