Verification of Electrical Inspections
Post Fire, Flood, or other Emergency Disconnection

- If your electricity was disconnected as the result of an emergency such as fire or flood, you must have the internal electrical circuits inspected by a Vermont-licensed electrician before GMP will turn the electricity back on.
- Please note, GMP will not be responsible in the event of damage resulting from reconnection.
- Fill out the Commercial/Residence Information completely and sign the bottom of the section where indicated. Call Customer Service at 1-888-835-4672 for assistance in finding the line, pole and meter information.
- Contact a Vermont-licensed journeyman or master electrician to inspect the internal electrical circuits.
- Make sure the electrician fills out the bottom section completely and signs the form.
- Call 1-888—835-4672 to request to have your electric service reconnected. This completed form will need to be provided to GMP prior to energizing.
- Give the completed form to the GMP Line Crew, a copy to your electrician and keep a copy for yourself.

Commercial/Residential Information

Date of Emergency Disconnect: _____ Date of Reconnection: _____
Owner's Name: _____ Phone: _____
Street Address of Structure: _____
City/Town: _____ State: _____ Zip: _____

I hereby request reconnection of the electrical service for the above referenced location.

Electrical Inspection Information

Electrician's Name: _____ Phone: _____
Business Name: _____
Mailing Address: _____
City/Town: _____ State: _____ Zip: _____
VT License#: _____ Journeyman Master
Expiration Date: _____

I hereby certify that I am licensed to perform electrical work in the State of Vermont. I have inspected the internal electrical circuits of the above referenced Commercial/Residential location. I acknowledge that the structure has been released by the Fire Chief for re-energizing, if involved in a fire, flood, or similar emergency. I further acknowledge that GMP shall be relying upon this certification for purposes of reconnecting electricity to the above referenced Commercial/Residential location. I certify that based upon my inspection, the location is safe to be re-energized.
